

Ultra-thin Smart Mobile Phone Sticker

Custom designed for Mobile phone

The mobile phone sticker enables consistent and reliable performance on mobile phone surfaces or in mobile phone case. Achieving RFID on metal is often a challenge and can result in lost data and inconsistent performance. However, with this special purpose encapsulation, metal detuning can be controlled.

Feature

- With Ultra-thin RFID shielding material, it can be put in the mobile phone case.

Specifications

- **Material:** PET
- **Protocol:** ISO14443A (Mifare), ISO15693 (Icode2)
 - **Dimension:** 40 x 30mm
- **Thickness:** 0.53 +/- 0.02mm or 0.69 +/- 0.02mm (with adhesive tape)
- **Surface finishing:** Canvas surface, crystal decoration
